OFFERING PHD STUDENT & ENGINEERS POSITIONS

The University Hospital Institute (IHU) "Méditerranée Infection" in Marseille is a 600-personnel medical institute (MD, PhD, pharmacists, biology researchers, engineers and technicians, and HCW) working on infectious diseases. It includes the largest diagnostic and research microbiology laboratory in France. Providing one of the largest genomic, transcriptomic and proteomic platform, it is one leader within the fields of microbiology, infectious diseases and emerging infections; it is also a key organ within the European surveillance network for imported infectious diseases. See additional information on www.ifr48.com

We are offering **3** 3-year **PHD** positions for students to work on the following topics:

1. Point of Care (POC)
2. Transfer and industrial development
3. Conflict of interest

As well as **2 ENGINEER** positions in the following domains:

1. Microbiogenomics
2. Collections (*this position is also open to a technician*)

To apply please send a curriculum vitae with a covering letter to contact@infectioplesud.com
